

Meyers DualSport Wild thing. On or off-road. Built by Denmat.

180 or 300 HP
Subaru
Engine

Seats 4

Off-road and
Street legal

Be the hit of the beach, sand dune, or Baja in the Meyers DualSport S. This is not your father's dune buggy. This is the Manxter at its extreme. Outrageous power comes from a Subaru engine, with your choice of 180 or 300+ horsepower. The functional wing houses the radiator and fan, keeping it protected from off-road dust and damage. It has a reinforced frame, extended wheelbase, and long travel suspension for tough off-road use. Yet it's street-legal and rides comfortably. And it seats four, so you can share the fun with your friends and family.

Don't have the time or inclination to build it yourself? Denmat Cars can build you a turnkey version that's ready to roll.

Jacked-up and knarly-looking, it's the baddest thing on or off-road. The Meyers DualSport S. There's nothing else like it. Nothing.
